SUBJECT INDEX - VOLUME 40

Acetylation, of estrogens, 389
Action potential, effect of estradiol on, 223
Adrenal cells, hypothalamic and pituitary periodicity in, 487
Affinity labeling, of NADH-5α-reductase by a nucleoside analogue, 1
Aldosterone, antagonism of, 81
Aldosterone, levels of, in mice, 319
Algal steroids, from *Eutreptia Viridis*, 403
16β-Alkyl-8α-estra-1,3,5(10)-triene-3,17β-diol derivatives, synthesis and estrogenic-antiestrogenic activities of, 171
7α-Alkyltestosterone derivatives, synthesis and activity as androgens and as aromatase inhibitors, 603
21-Amino-17-hydroxyprogesterone, fluorimmunoassay using, 393
Androgen levels, quantitation by combined high performance liquid chromatography and radioimmunoassay, 369
Androgen receptor, effect of protease inhibitors on, 189
Androgen regulation of progestin enzymes, 691
Androgens, 7α-Alkyltestosterone derivatives as, 603
5α-Androstan-3β,17β-diol-6α-hydroxylase, studies on, 625
5α-Androstane-1β,3β,5,6β-tetrol-17-one, from *sarcophyton glaucum*, 673
Anordrin, antagonism by, 65
Antagonistic actions, of Anordrin, 65
Anterior hypophysis, hydroxylases in, 625
Anti-arrhythmic enatiosteroid, 615
Antibacterial properties, of bile acid components, 347
Antiglucocorticoids, Δ^1-11-oxa-11-deoxycortisol, 425
Antitumor agents, 157
Aromatase inhibitors, 7α-alkyltestosterone derivatives as, 603
Aromatase, photoaffinity inhibitor of, 679
Atrial tissue, estradiol in, 223
7α-(4'-azido)phenylthioandrost-4-ene-3,17-dione, photoaffinity inhibitor, 679

Bile acid circulation, in dog, 413
Bile acid oxazoline compounds, antibacterial properties of, 347
Bile acids and derivatives, preparation of, 701
Bile acids, synthesis and absolute configuration of, 11
Bovine serum albumin conjugates, 245
Bovine tissues, progesterone in, 287

15α-Carboxymethyl-17β-hydroxyandrost-4-en-3-one, synthesis of, 245
15β-Carboxymethyl-17β-hydroxyandrost-4-en-3-one, syntheiss of, 245
Catechol estrogens, effects on oxidases, 651
Chenodeoxycholic acid synthesis, 581
Cholecystectomy, enterohepatic circulation after, 413
Cholesterol analogs, for silkworm growth, 341
Cholic acid, synthesis of, 701
Conjugates, of adrenal steroid metabolites, 23
Corticoid formation, in monkey, 475
Crown ethers, as catalyst, with CuI, 121
Crystal structure, of (20*R*)-20-Phenyl-5-pregnene-3β,20-diol, 359

24,26-Cyclocholesta-5,22E-dien-3β-01 from *Sarcophyton Glaucum*, 665
24,26-Cyclocholesterol, from marine sterols, 455
Cyclopropyl sterols, from marine invertebrates, 455

Dakin oxidation, of 2-acetyl estrogens, 389
Dehydrogenase, alchohol, in rat, 591
Dehydrogenase, 3β-hydroxysteroid activity, 331
7-Dehydroxylase, bile acid activities of, 347
Deoxycholic acid, synthesis of, 701
11-Deoxycortisol, fluoroimmunoassay of, 393
Deuterium labeling, stilbestrols, 713
2,4-Dibromoestrogens, nucleophilic substitution of, 121
Diethylstilbestrol, synthesis of, 713
3β-7α-Dihydroxy-5-cholen-24-oic acid, metabolism of, 581
6β,7β,15β,16β-Dimethylen-1,4-androstadiene-(17-(β-1')-spiro-5') perhydrofuran-2'3-dione, metabolites of, 81
1,6-Dithiabenz(3,4)estra-3,5(10),8,14-tetraen-17-one, synthesis of, 516
1,6-Dithia Pentacyclic Steroids, synthesis of, 516
Dog, bile acid circulation in, 413

Ecdysteroid conjugates, in *Locusta Migratoria*, 551
Embryo transfer, in hamster uterus, 133
5-Ene-3-Ketosteroid isomerase, 331
17-Enol esters, formation of, 261
Enterohepatic circulation, in dog, 413
Estradiol, effect of, on atrial action potential, 223
8α-Estradiol derivatives, synthesis and pharmacology of, 171
Estradiol fatty acyl esters, formation of, in mammary tumors, 149
Estrogen effects, on NADH oxidase, 651
Estrogen receptor, in leydig cells, 53
Estrogen receptor regulatory factor (ReRF), 465
Estrogen receptor, relative binding affinities of 16β-alkyl and 2, 16β-dialkyl derivatives of 8α-estradiol, 171
Ethanol-induced reductions, in steroidogenesis, 561
4-Ethenylidene-5α-androstane-3β,17β-diol and 4-ethenylidene-5α-androstane-3,17-Dione, synthesis of, 109
24-Ethylcholesta-5,7,23Z-trien-3β-ol, marine sterol, 403
Eutreptia Viridis, sterols from, 403

Fetal Adrenal, corticoid formation in, 475
Fluoroimmunoassay, for 11-deoxycortisol, 393
Formation and isolation of Δ^5-3-ketosteroids using a purified rat liver alcholol dehydrogenase, 591

Glaucasterol, from *Sarocophyton Glaucum*, 665
Glucocorticoid antagonists, 425
Glucosiduronates, C-3, of adrenal steroid metabolites, 23
Glucuronide conjugation, in bovine, 287
Granulsoa cells, androgen regulation of, 691
Gynaecological tissues, steroid receptors in, 139

Hamster uterus, uptake of estradiol in, 133
High performance liquid chromatography, of androgens, 369
Hormonal properties, of anordrin, 65
HPLC (High Performance Liquid Chromatography) of estrogens, androgens and progestogens, 381
11-Hydroxylase activity, in corticoid formation, 475
17α-Hydroxylase activity, in kidney, 91
21-Hydroxylase activity, in corticoid formation, 475
6α and 7α-hydroxylases activity, 625
1-Hydroxylated bile-acids, synthesis of, 661
17β-Hydroxy-4-estren-3-one 17-decanoate, effect of, on osteoporosis, 125
2-Hydroxyl estrogens, synthesés of, 389
3β-Hydroxysteroid dehydrogenase, 331
17β-Hydroxysteroid dehydrogenase, 465
20α-Hydroxysteroid dehydrogenase, effect of prostaglandins upon, 99
Hyodeoxycholic acid, synthesis of, 701
Hypothalamic periodicity, demonstrated by isolated rat adrenal cells, 487

Insect sterols, structural requirements of, 341
Irreversible inactivation, of 3β(and 17β)-hydroxysteroid dehydrogenase from P. testosteroni by 4-ethenylidene-5α-androstane-3, 17-dione, 109
Isoelectric focusing, with progesterone receptors, 503
Isomerase, 5-ene-3-ketosteroid activities, 331

Δ^5-3-Ketosteroids, formation and isolation of, 591
Kidney, 17α-hydroxylase in, 91

Leydig cell, estradiol receptors in, 53
Leydig cell, steroid metabolism in, 535
LHRH agonist, comparative effects of, 641
Lipoidal estradiol, synthesis of, in mammary tumors, 149
Locusta Migratoria, conjugates in, 551
Luteinizing hormone, in rat, 641

Mammary gland, progesterone receptors, 503
Mammary tumors, synthesis of fatty acyl esters of estradiol in, 149
Marine sterols, 455
Marine sterols, in *Eutreptia Viridis*, 403
Marine sterols, in *Pyrocystis Lunula*, 307
Marine sterols, in *Sarcophyton Glaucum*, 209
Marine sterols, in *Tunicate Ascida Nigra*, 433
Mass spectrometry, direct analysis of steroid conjugates, 35
Mechanism-based irreversible inactivation, of bovine adrenal Δ^5-3β-hydroxysteroid dehydrogenase by 4-ethenylidene steroids, 109
Metabolism, of 3β-7α-dihydroxy-5-cholen-24-oic acid, 581
Metabolism, of progesterone, 287
Ent-3-Methoxy-16α-methylaminoestra-1,3,5(10)-trien-17β-ol, synthesis and antiarrhythmic activity of, 615
Nat-3-Methoxy-16α-methylaminoestra-1,3,5(10)-trien-17β-ol, synthesis, cholestrol lowering and antiarrhythmic activity of, 615

Methyl 1α,3α-dihydroxy-5β-cholanate, synthesis of, 661
Methyl 1α,3α-dihydroxy 5β-cholan-24-oate, synthesis of, 661
4α-Methyl steroids, from *Tunicate Ascidia Nigra*, 433
Microbial transformations, conversion of withaferin-A to 12β- and 15β-hydroxy derivatives of withaferin-A, 157
Microsomes, human placental, 331
Molybdate concentrations, effect upon estrogen receptors, 53
Molybdate, effect on steroid receptors, 139

NADH oxidase, estrogen effects on, 651
NADH-Δ^4-5α-reductase, 1
19-Norethisterone, thallium and potassium salts of, 261
Nucleophilic substitution of 2,4-dibromoestrogens, 121

Z-2,3',3",4,5,5',5"-Octadeuterio-3,4-bis(p-hydroxy-phenyl)-2-hexene, synthesis of, 713
E-2,2,3',3",5,5,5',5"-Octadeuteriodiethylstilbestrol, synthesis of, 713
Oesteoporosis, studies on, 125
Ovarian steroidogenesis, during rat estrus cycle, 203
Ovine LH administration, in rat, 641
Δ^1-11-Oxa-11-deoxycortisol, *in vivo* activity of, 425

Parathyroid cells, effect of vitamin D metabolites in, 275
Pentacyclic heterosteroids, synthesis of, 516
Peroxidase-catalyzed formation, of progesterone, 569
(20*R*)-20-Phenyl-5-pregnene-3β,20-diol, crystal structure of, 359
Photoaffinity inhibitor, of aromatase, 679
Pituitary periodicity, demonstrated by isolated rat adrenal cells, 487
Placenta, 20α-hydroxy steroid dehydrogenase in, 99
Portacaval shunt, enterohepatic circulation after, 413
Pregnenolone metabolism, in rat, 535
Premature mice, aldosterone levels in, 319
Progesterone, formation of, 569
Progesterone, mechanism of action, 465
Progesterone metabolism, *in vitro*, 287
Progesterone receptor, in mammary tissue, 503
Progestin binding, in cows, 503
Progestins, androgen regulation of, 691
Prostaglandins, effect of, on 20α-hydroxysteroid dehydrogenase, 99
Prostate, androgen receptors in, 189
Protease inhibitors, effect of, on androgen receptors, 189
Pyrocystis Lunula, marine sterols in, 307
Pyrogallolestrogen dimethyl ethers, syntheses of, 121

Quantitation, of steroids by reverse phase HPLC, 381

Rats, vitamin D metabolites in, 275

Sarcophyton Glaucum, marine sterols in, 209, 665, 673
5,6-Seco-Δ^8,Δ^{14}-dehydroesterone methyl ether, synthesis of, 267
Separation, of steroids by reverse phase HPLC, 381
Silkworm growth, sterol nucleus requirements for, 341

Sitosterolemia and xanthomatosis, 5α-stanols in patients with, 233
Soft coral, marine sterols in, 209
Spirorenone, metabolites of, 81
Spleen and thymus, 17-α-hydroxylase in, 91
5α-Stanols, identification of, in plasma of patients with sitosterolemia and xanthomatosis, 233
Steroidal glucosiduronates, 23
Steroidal organoboranes, stereochemistry of their protonolysis, 233
Steroid biosynthesis, inhibitors in, 359
Steroid conjugates, direct analysis of, 35
Steroid 17α-hydroxylase, in kidney, 91
Steroidogenesis, ethanol-induced, 561
Steroid receptors, effect of molybdate on, 139
Superoxide dismutase, estrogen effects on, 651
Syntheses, of 15α and 15β-carboxymethyltestosterone bovine serum albumin conjugates, 245

Testicular steroidogenesis, in rat, 641
Testosterone, production in rat, 535
Testosterone, steroidogenesis of, 561
(23R and 23S)-3α,7α,12α,23-Tetrahydroxy-5β-cholan-24-oic acids methyl and ethyl esters, synthesis of, 11
(23R and 23S)-3α,7α,23-Trihydroxy-5β-cholan-24-oic acids methyl and ethyl esters, synthesis of, 11
Tunicate Ascida Nigra, marine sterols from, 433

Ursodeoxycholic acid, synthesis of, 701
Uterine growth inhibition, effect of 16β-alkyl and 2, 16β-dialkyl 8α-estradiol derivatives on, 171
Uterine receptors, of estradiol, 133

Vitamin D metabolites, effect on parathyrin secretion, 275

Withaferin-A, microbial transformations of, 157
